

I received notice that there is consideration of changing a radio frequency in my area to a LPFM frequency. This would be a mistake. I currently listen to K-Love on 94.3 in my area, K-Love is a radio station that allows listeners a safe choice, the music is inspirational. There is so much my friends and I gain from this station, the news is delivered balanced with many positive stories. There are not many radio stations committed to creating a healthy family environment, teaching our children values early on will benefit the community in the future. K-Love is a wonderful station that serves the public by helping all the listeners to grow towards becoming a community servant. Please don't replace the frequency with an LPFM frequency.
